Medical School: Ross University School of Medicine

Tanveer Brar, MD – PGY 1

Medical School: Aureus University School of Medicine

Renee Brumbaugh, MD – PGY 1

Medical School: Northeast Ohio Medical University

Raymond Vaio, DO – PGY 1

Medical School: Ohio University Heritage College of Osteopathic Medicine

- **Alumni Profiles**

Stephen Adu-Yeboah, MD
Class of 2020

“The program prepared me to be able to face anything in primary care. I had the privilege to care for many patients with complicated cases and multiple comorbidities. This made the experience challenging in the beginning but with the guidance of the great faculty we have at YPC, I learned a lot and after completing the program I feel very comfortable even with those

difficult cases. I feel privileged to have learned from some of the brightest and most experienced doctors in the field of primary care. The staff is also amazing!”

Alberto Arias, MD
Class of 2020

“The atmosphere at St E’s FM residency is a welcoming and friendly one which made my job as a resident much less stressful than anticipated. The education from the real-life experience is second to none and prepared me so the that now I am able to work on my own confidently.”

Michael Cratsley, MD
Class of 2020

“From the beginning of my residency, I knew that sports medicine fellowship was a goal of mine. The Mercy Health St. Elizabeth’s Youngstown Family Medicine Residency not only provided me with the tools to become a well-rounded, board-certified family physician but allowed me to tailor my experience during residency to include concussion care for local high

schools, elective rotations and research opportunities to make me a competitive primary care sports medicine fellowship candidate.”

Andrea Hastings, MD
Class of 2020

"Graduated confident and prepared. I made lifelong resident friends and attending colleagues I talk with daily. Super grateful for my Youngstown Family."

Armani Orihuela, MD
Class of 2020

"SEYH FM prepared me for my career by encompassing true family medicine. I am doing traditional Family Medicine and the fundamentals I learned everyday in residency permeate through my everyday life. The inpatient experience really prepares you for everyday inpatient life as a FM doctor. The outpatient experiences really make the transition to outpatient work seamless. I appreciated the faculty and their style of teaching that helped cultivate me into the Family Medicine physician I am. They were not only nurturing of one's clinical skills but of life skills during my three years. I enjoyed my three years in the program."
