Commission on Cancer

- Established by the American College of Surgeons (ACoS) in 1922
- A consortium of professional organizations dedicated to improving survival and quality of life for cancer patients
- Sets standards to ensure quality, multidisciplinary, and comprehensive cancer care delivery in health care settings
- Conducts surveys to assess compliance with those standards
- Collects standardized data to measure cancer care quality
- Uses data to monitor treatment patterns and outcomes and enhance cancer control and clinical surveillance activities
- Develops educational interventions to improve cancer prevention, early detection, cancer-care delivery, and outcomes

Commission on Cancer: The Value of Accreditation

- **Demonstrates commitment** to patients, communities, providers, payers, and policymakers to improving survival and quality of life for patients and to evidence-based, organized, comprehensive, and quality cancer care
- **Standards ensure that state-of-the-art** clinical services for diagnosing, treating, rehabilitating, and supporting cancer patients and their families are available to provide **quality care**
- **National Cancer Data Base** participation by cancer registries captures more than 100 data elements for every patient and more than 70% of all new cancer patients diagnosed in the U.S. each year. Participant User File (PUF) access for research is only available to investigators at CoC-approved programs
- **Measuring quality and outcomes**, including overall survival, through a rapidly expanding panel of quality measures for cancers of the breast, colon, rectum, lung, esophagus, and stomach, and soon to include gynecologic and urologic malignancies, melanoma, sarcoma and pediatric tumors. Comparison with nation-wide data from all 1,500 CoC-accredited programs
- **Ensures a multidisciplinary team approach** including information and access to clinical trials, access to prevention and early detection programs, cancer conferences, and oversight by a Cancer Committee

Role of the Cancer Liaison Physician (CLP)

CLPs monitor the performance of their Cancer Program to address challenges and opportunities using information from the following NCDB Tools that include:

Accountability Measures

Quality Improvement Measures

Surveillance Measures

Survival Reports

Cancer Program Profile Practice Reports (CP3R)

Cancer Quality Improvement Program (CQIP)

Hospital Comparison Benchmark Reports (HCBM)

Rapid Quality Reporting System (RQRS)

Standard 4.3 *Role of the Cancer Liaison Physician - A Cancer Liaison Physician serves in a leadership role within the cancer program, and is responsible for evaluating, interpreting and reporting the program's performance using the National Cancer Data Base (NCDB) data. The CLP reports the results of this analysis to the cancer committee at least four times a year.*

National Cancer Data Base (NCDB)

- A joint program of the CoC and the American Cancer Society that began in 1988
- A nationwide oncology database for more than 1,500 CoC-accredited U.S. cancer programs
- 70 percent of all newly diagnosed U.S. cancer cases are captured at the facility level and reported
- Contains approximately 32 million records from hospital cancer registries across the U.S.
